

## Total Experience

7+ Years in Full Stack

## Qualification

B.Tech in ECE

## Work history

### Skillsoft

Jun 2020 – Present

### HCL Technologies

Jul 2018 – Jun 2020

### InfoCepts Technologies

Mar 2018 – Jul 2018

### Tata Consultancy Services

Jun 2015 – Mar 2018

## Work Summary

- Worked on Java , angular as key skills.
- Designed Mean stack application with node and react.
- UI Developer with Angular, React

## Personal Info.

DOB: 15/06/1993

Address : 1-147,  
Meerjapuram(Vil),  
Kolimigundla (M) ,  
Kurnool(Dist) , 518123

## Languages known

- Telugu
- English
- Hindi

## Summary and Accomplishments

- Having almost **7** years of experience as a Full Stack Developer using technologies **Java** and **Angular** framework.
- Hands on experience in designing mean stack application using **Node** and **React**.
- Strong with OOPS concepts, MVC and Micro Services Architecture.
- Strong expertise in responsive UI/UX design and implementation.
- Good knowledge on creating web API's using REST and integrating with frontend.
- Followed Agile practices, Unit testing using Junit, Jest, and functional test automation with Selenium.
- Knowledge on using versioning control system with Git and SVN.
- Involved in complete Software Development Life Cycle (SDLC) including System Designing, data modelling, application development that involves various stages in development, maintenance, and support.
- Adaptable to new technologies.
- Experience in code reviews and troubleshooting prod issues.
- Strong communication, collaboration & team building skills with proficiency in grasping new technical concepts quickly and self-starter always inclined to learn new technologies and team player with very good communication, organization, and interpersonal skills

## Technical Skills

<b>Programming Languages</b>	Java, Node, JavaScript
<b>Hands-on Technologies</b>	Angular, React, HTML 5, CSS, Bootstrap, Hibernate, Spring, Docker, Flutter
<b>Databases</b>	PostgreSQL, Oracle
<b>Development Tools</b>	Eclipse, VS Code
<b>Quality Assurance Tools</b>	Junit, Jest, Selenium
<b>Versioning control Tools</b>	Git, SVN
<b>Operating Systems</b>	Windows, Linux

## Educational Details

- **B. Tech** in Electronics and Comm. Engineering with 84.6 % from Sree Vidynikethan Engg. College.
- **Diploma** in Electronics and Comm. Engineering with 89.65% from E.S.C Govt. Polytechinc , Nandyal.
- **S.S.C** with 90% from Sai Vijetha School , Tadipatri.

## Project Profiles

### Project Details

#### PERCIPIO (ILT)

Jun 2020 - Present

#### Role

Full stack Developer

### Responsibilities

- As a Full stack web developer responsible for Analyzing the requirement and creating/modifying REST API's, Tables, background CRON jobs.
- Create/Modify the user interface to fulfill the customer needs.
- Improving code quality and unit test coverage as part of tech debt.
- Debugging the code to fix any product related issues by analyzing the scrubbed DB.

### Overview

ILT (Instructor led training) is a sub module in Percipio. Admin manage all aspects of a multiple courses, such as when and where it is held, who teaches it, and who attends. Learners can register/waitlist for available courses . Instructors can mark learner attendance.

### Project Details

#### TPO (Travel Price optimization)

Jul 2018 – Jun 2020

#### Role

Full stack Developer

### Responsibilities

- Full stack web developer responsible for end-to-end web app development with Java and Angular as key skills with a team of 11 people.
- Designed configurable dashboard for serving all customer needs in one application named Calendar home.
- A plug and play dashboard designed to monitor nightly batch status. User can configure and monitor multiple databases.

### Overview

TPO recommends optimal prices by analyzing the demand forecast, available inventory and competitor prices. The system provides pricing decisions based on holistic view of the market in order to maximize profits for both low and high demand periods by considering special events, seasons, holidays and promotions.

### Project Details

#### Nielson

Mar 2018-Jun 2018

#### Role

UI Developer

### Responsibilities

- Design and Development of Web application using Angular 5 as key Skill.
- Visualization of data using D3 charts.
- Creating a demo usage for the components that are created for Nielson.

### Project Details

#### eTMS (Enterprise transport management system)

Jun 2015 –Mar 2018

#### Role

### Responsibilities

- Full stack web developer responsible for end-to-end application design.
- Following agile practices, Unit testing, Test automation, CI/CD and versioning control system with SVN.
- Optimizing code for better performance.

### Overview

eTMS is a Transport application where Employee made a transport request to that locality. Application will group such request of same locality and creates a trip by assigning a vehicle which is defined in system by Transport Admin Role.
